Bed size, children's beds (length x width)	mm	-	-	-	1.970 x 690; 1.930 x 790

Footnotes

- The maximum technically permissible laden mass is the gross vehicle weight specified by the manufacturer, which must not be exceeded under any circumstances when driving the vehicle.
- Depending on the model, configuration, tyres, and optional extras the vehicle height can vary.
- The "mass in running order" generally corresponds to the weight of the vehicle as standard, empty, in accordance with the manufacturer's specifications. The mass in running order includes the mass of the vehicle fitted with the standard equipment in accordance with the manufacturer's specifications, including the mass of the body, the trailer hitch, the tyre repair set and all fluids (the fresh water tank, hot water heater and, where applicable, the toilet flush tank and one aluminium gas bottle (16.5 kg), all of which are filled to capacity). This is a calculated value determined as part of the type approval procedure. This is subject to legally permissible tolerances of up to ± 5% (see note in brackets). Since the occurrence of legally permissible tolerances has a direct impact on the remaining loading capacity of the individual vehicle, these tolerances must be taken into account when configuring the vehicle.

- The maximum mass for optional extras is a value calculated for each layout that HOBBY uses to limit the available mass for optional extras that can be ordered and fitted at the factory. The aim of this value is to ensure that the legally prescribed minimum loading capacity is observed. If selecting optional extras increases the actual vehicle mass to such an extent that there is no longer sufficient available mass between the actual vehicle mass and the maximum technically permissible laden mass for the passengers (only with motorhomes and vans) and the minimum loading capacity, depending on the layout, you can choose to increase the load capacity of the vehicle (increase the maximum technically permissible laden mass) during the configuration. Alternatively, you can reduce the permitted number of people while driving (only for motorhomes and vans) and/or deselect optional extras. Otherwise, you will be unable to continue configuring the vehicle or proceed with the ordering process.
- Maximum total weight of luggage that can be fastened using the four tie down eyelets = 55 kg.

6 Battery-powered.

7 Includes: Homologation / EU Type Approval, CoC / Vehicle Registration Certificate Part II and Gas Test Certificate.
